RapidRead

KEYMACRO is a program that was created to enable users to read on a screen at a slower or faster rate, based on a certain number of words per minute (wpm). This can be extremely useful, especially for people who have difficulties reading at an effective rate. In other words, if your reading speed is not ideal, you can either slow it down or speed it up, depending on your reading needs. What are the specifications of the application? The operating system on which KEYMACRO is required to run on: Windows 7, 8, 8.1, 10. What kind of user is KEYMACRO designed for? KEYMACRO is suitable for everyone who needs to read faster. However, for those who read at a lower speed than usual, it can be an excellent tool for reinforcing their reading skills. How can I download the app? KEYMACRO can be downloaded by clicking the button below: NOTE: If you are experiencing any problems with the download, check your network settings and ensure that 'File Sharing' is set to 'On'. How is KEYMACRO different from other applications? Although KEYMACRO is like any other 'speed reading' program, its focus is on enabling the user to read at a set rate of words per minute (wpm) for a prolonged period of time, without having to pause the program. In other words, the program focuses on the execution of specific commands that enable the user to read faster. Why should I use KEYMACRO? KEYMACRO is not an application that aims to replace your reading skills. Instead, it is designed to make reading more fun, so that you can read more effectively at a faster or slower rate. For instance, if you have difficulties reading English, the program can be extremely useful for reading text at a slower rate. A new feature that enables KEYMACRO to be a reliable tool for reading is the fact that it allows the user to insert a specific number of words per minute (wpm) and a specific number of pages per minute (ppm). How can I use this application? KEYMACRO is a simple application. The following is a video tutorial that demonstrates how to install the program and use it: How can I use the program to enable me to read faster
